

Windows 10 Help on Commands

C:\>HELP FIND

Searches for a text string in a file or files.

FIND [/V] [/C] [/N] [/I] [/OFF[LINE]] "string" [[drive:][path]filename[...]]

- /V Displays all lines NOT containing the specified string.
- /C Displays only the count of lines containing the string.
- /N Displays line numbers with the displayed lines.
- /I Ignores the case of characters when searching for the string.
- /OFF[LINE] Do not skip files with offline attribute set.
- "string" Specifies the text string to find.
- [drive:][path]filename
Specifies a file or files to search.

If a path is not specified, FIND searches the text typed at the prompt or piped from another command.
