

Windows 10 Help on Commands

C:\>HELP GPRESULT

GPRESULT [/S system [/U username [/P [password]]]] [/SCOPE scope]
[/USER targetusername] [/R | /V | /Z]

Description:

This command line tool displays the Resultant Set of Policy (RSoP) information for a target user and computer.

Parameter List:

- /S** system Specifies the remote system to connect to.
- /U** [domain\]user Specifies the user context under which the command should run.
- /P** [password] Specifies the password for the given user context. Prompts for input if omitted.
- /SCOPE** scope Specifies whether the user or the computer settings need to be displayed.
Valid values: "USER", "COMPUTER".
- /USER** [domain\]user Specifies the user name for which the RSoP data is to be displayed.
- /R** Displays RSoP summary data.
- /V** Specifies that verbose information should be displayed. Verbose information provides additional detailed settings that have been applied with a precedence of 1.
- /Z** Specifies that the super-verbose information should be displayed. Super-verbose information provides additional detailed settings that have been applied with a precedence of 1 and higher. This allows you to see if a setting was set in multiple places. See the Group Policy online help topic for more information.
