Apache2::SiteControl::ManagerFactory(3pm)

NAME

Apache2::SiteControl::ManagerFactory - An abstract base class to use as a pattern for custom PermissionManager production.

DESCRIPTION

This package is a simple abstract base class. Use it as the base for creating your instances of permission managers. For example,

```
package MyManagerFactory;
use strict; use Apache2::SiteControl::ManagerFactory;
use base qw(Apache2::SiteControl::ManagerFactory);
our $manager;
sub getPermissionManager {
    return $manager if(defined($manager) &&
$manager->isa(Apache2::SiteControl::ManagerFactory));
    $manager = new Apache2::SiteControl::PermissionManager;
    $manager->addRule(new XYZRule);
    $manager->addRule(new SomeOtherRule);
    return $manager;
}
1;
```
