NAME

Apache::AuthCookie::Params::Base - Internal CGI AuthCookie Params Base Class

VERSION

version 3.31

SYNOPSIS

Internal Use Only!

DESCRIPTION

This is the base class for AuthCookie Params drivers.

METHODS

new(\$r)

Constructor. This will generate either an internal Apache::AuthCookie::Params::CGI object, or, if available, use libapreq2. Note that libapreq2 will not be used if you turned on "Encoding" support because libapreq2 does not have any support for unicode.

SOURCE

The development version is on github at

<<https://github.com/mschout/apache-authcookie>> and may be cloned from

<git://https://github.com/mschout/apache-authcookie.git>

## BUGS

Please report any bugs or feature requests on the bugtracker website

<<https://github.com/mschout/apache-authcookie/issues>>

When submitting a bug or request, please include a test-file or a patch to an existing test-file that illustrates the bug or desired feature.
