Rocky Enterprise Linux 9.2 Manual Pages on command 'Apache::Session::Serialize::Storable.3pm'

\$ man Apache::Session::Serialize::Storable.3pm

Apache::Session::Serialize::Storable(3pm)

NAME

Apache::Session::Serialize::Storable - Use Storable to zip up persistent data

SYNOPSIS

```
use Apache::Session::Serialize::Storable;
```

```
$zipped = Apache::Session::Serialize::Storable::serialize($ref);
```

```
$ref = Apache::Session::Serialize::Storable::unserialize($zipped);
```

DESCRIPTION

This module fulfills the serialization interface of Apache::Session. It serializes the data in the session object by use of Storable's "nfreeze()" and "thaw()" functions. The result is a binary object ready for storage.

AUTHOR

This module was written by Jeffrey William Baker <jwbaker@acm.org>.
