AptPkg::Policy(3pm) User Contributed Perl Documentation AptPkg::Policy(3pm)

NAME

AptPkg::Policy - APT package version policy class

SYNOPSIS

use AptPkg::Policy;

DESCRIPTION

The AptPkg::Policy module provides an interface to APT's package version policy.

AptPkg::Policy

The AptPkg::Policy package implements the APT pkgPolicy class.

An instance of the AptPkg::Policy class may be fetched using the "policy" method from an AptPkg::Cache object.

The following methods are implemented:

priority(VER|FILE)

Return the pin priority for the given VER (AptPkg::Cache::Version) or FILE (AptPkg::Cache::PkgFile) object.

candidate(PKG)

Returns the installation candidate version for PKG. Returns an AptPkg::Cache::Version object.

SEE ALSO

AptPkg::Cache(3pm), AptPkg(3pm).
