Crypt::PRNG::RC4(3pm)      User Contributed Perl Documentation      Crypt::PRNG::RC4(3pm)

**NAME**

Crypt::PRNG::RC4 - Cryptographically secure PRNG based on RC4 (stream cipher) algorithm

**SYNOPSIS**

### Functional interface:

use Crypt::PRNG::RC4 qw(random\_bytes random\_bytes\_hex random\_bytes\_b64 random\_string random\_string\_from rand irand);

```
$octets = random_bytes(45);  
$hex_string = random_bytes_hex(45);  
$base64_string = random_bytes_b64(45);  
$base64url_string = random_bytes_b64u(45);  
$alphanumeric_string = random_string(30);  
$string = random_string_from('ACGT', 64);  
$floating_point_number_0_to_1 = rand;  
$floating_point_number_0_to_88 = rand(88);  
$unsigned_32bit_int = irand;
```

### OO interface:

```
use Crypt::PRNG::RC4;
```

```
$prng = Crypt::PRNG::RC4->new;

#or

$prng = Crypt::PRNG::RC4->new("some data used for seeding PRNG");

$octets = $prng->bytes(45);
$hex_string = $prng->bytes_hex(45);
$base64_string = $prng->bytes_b64(45);
$base64url_string = $prng->bytes_b64u(45);
$alphanumeric_string = $prng->string(30);
$string = $prng->string_from('ACGT', 64);
$floating_point_number_0_to_1 = rand;
$floating_point_number_0_to_88 = rand(88);
$unsigned_32bit_int = irand;
```

## DESCRIPTION

Provides an interface to the RC4 based pseudo random number generator

All methods and functions are the same as for Crypt::PRNG.

## FUNCTIONS

random\_bytes

See "random\_bytes" in Crypt::PRNG.

random\_bytes\_hex

See "random\_bytes\_hex" in Crypt::PRNG.

random\_bytes\_b64

See "random\_bytes\_b64" in Crypt::PRNG.

random\_bytes\_b64u

See "random\_bytes\_b64u" in Crypt::PRNG.

random\_string

See "random\_string" in Crypt::PRNG.

random\_string\_from

See "random\_string\_from" in Crypt::PRNG.

rand

See "rand" in Crypt::PRNG.

irand

See "irand" in Crypt::PRNG.

## METHODS

new

See "new" in Crypt::PRNG.

bytes

See "bytes" in Crypt::PRNG.

bytes\_hex

See "bytes\_hex" in Crypt::PRNG.

bytes\_b64

See "bytes\_b64" in Crypt::PRNG.

bytes\_b64u

See "bytes\_b64u" in Crypt::PRNG.

string

See "string" in Crypt::PRNG.

string\_from

See "string\_from" in Crypt::PRNG.

double

See "double" in Crypt::PRNG.

int32

See "int32" in Crypt::PRNG.
