DBI::Const::GetInfoType(3pm) User Contributed Perl Documentation DBI::Const::GetInfoType(3pm)

NAME

DBI::Const::GetInfoType - Data describing GetInfo type codes

SYNOPSIS

```
use DBI::Const::GetInfoType;
```

DESCRIPTION

Imports a %GetInfoType hash which maps names for GetInfo Type Codes into their corresponding numeric values. For example:

```
$database_version = $dbh->get_info( $GetInfoType{SQL_DBMS_VER} );
```

The interface to this module is new and nothing beyond what is written here is guaranteed.

perl v5.34.0
