\$ man DBM_Filter::compress.3perl

DBM_Filter::compress(3perl) Perl Programmers Reference Guide DBM_Filter::compress(3perl)

NAME

DBM_Filter::compress - filter for DBM_Filter

SYNOPSIS

use SDBM_File; # or DB_File, GDBM_File, NDBM_File, ODBM_File

use DBM_Filter ;

\$db = tie %hash, ...

\$db->Filter_Push('compress');

DESCRIPTION

This DBM filter will compress all data before it is written to the database and uncompressed it on reading.

A fatal error will be thrown if the Compress::Zlib module is not available.

SEE ALSO

DBM_Filter, perldbmfilter, Compress::Zlib
