NAME

Dpkg::Vendor::Ubuntu - Ubuntu vendor class

DESCRIPTION

This vendor class customizes the behaviour of dpkg scripts for Ubuntu specific behavior and policies.

PUBLIC FUNCTIONS

`$bugs = Dpkg::Vendor::Ubuntu::find_launchpad_closes($changes)`

Takes one string as argument and finds "LP: #123456, #654321" statements, which are references to bugs on Launchpad. Returns all closed bug numbers in an array reference.

CHANGES

Version 0.xx

This is a semi-private module. Only documented functions are public.

1.21.1 2024-02-23 Dpkg::Vendor::Ubuntu(3perl)
