ExtUtils::Constant::Utils(3perl) Perl Programmers Reference GuideExtUtils::Constant::Utils(3perl)

NAME

ExtUtils::Constant::Utils - helper functions for ExtUtils::Constant

SYNOPSIS

```
use ExtUtils::Constant::Utils qw (C_stringify);  
  
$C_code = C_stringify $stuff;
```

DESCRIPTION

ExtUtils::Constant::Utils packages up utility subroutines used by ExtUtils::Constant, ExtUtils::Constant::Base and derived classes. All its functions are explicitly exportable.

USAGE

C_stringify NAME

A function which returns a 7 bit ASCII correctly \ escaped version of the string passed suitable for C's "" or ". It will die if passed Unicode characters.

perl_stringify NAME

A function which returns a 7 bit ASCII correctly \ escaped version of the string passed suitable for a perl "" string.

Nicholas Clark <nick@ccl4.org> based on the code in "h2xs" by Larry Wall and others
