File::Spec::AmigaOS(3perl) Perl Programmers Reference Guide File::Spec::AmigaOS(3perl)

NAME

File::Spec::AmigaOS - File::Spec for AmigaOS

SYNOPSIS

```
require File::Spec::AmigaOS; # Done automatically by File::Spec
                               # if needed
```

DESCRIPTION

Methods for manipulating file specifications.

METHODS

tmpdir

Returns \$ENV{TMPDIR} or if that is unset, "/t".

file\_name\_is\_absolute

Returns true if there's a colon in the file name, or if it begins with a slash.

All the other methods are from File::Spec::Unix.
