NAME

"Future::IO::Impl::IOAsync" - implement "Future::IO" using "IO::Async"

DESCRIPTION

This module provides an implementation for Future::IO which uses IO::Async.

There are no additional methods to use in this module; it simply has to be loaded, and will provide the "Future::IO" implementation methods.

```
use Future::IO;
```

```
use Future::IO::Impl::IOAsync;
```

```
my $f = Future::IO->sleep(5);
```

```
...
```
