Glib::Boxed(3pm) User Contributed Perl Documentation Glib::Boxed(3pm)

NAME

Glib::Boxed - Generic wrappers for C structures

DESCRIPTION

Glib::Boxed is a generic wrapper mechanism for arbitrary C structures. For the most part you don't care about this as a Perl developer, but it is important to know that all Glib::Boxed descendents can be copied with the "copy" method.

HIERARCHY

Glib::Boxed

METHODS

copy_of_boxed = \$boxed->copy
Create and return a new copy of \$boxed.
