Rocky Enterprise Linux 9.2 Manual Pages on command 'IO.3perl'

\$ man IO.3perl

IO(3perl) Perl Programmers Reference Guide IO(3perl)

NAME

IO - load various IO modules

SYNOPSIS

use IO qw(Handle File); # loads IO modules, here IO::Handle, IO::File

use IO; # DEPRECATED

DESCRIPTION

"IO" provides a simple mechanism to load several of the IO modules in one go. The IO modules belonging to the core are:

- IO::Handle
- IO::Seekable
- IO::File
- IO::Pipe
- IO::Socket
- IO::Dir
- IO::Select
- IO::Poll

been installed from CPAN. You can discover which ones exist with this query:

<<https://metacpan.org/search?q=IO%3A%3A>>.

For more information on any of these modules, please see its respective documentation.

DEPRECATED

```
use IO;          # loads all the modules listed below
```

The loaded modules are IO::Handle, IO::Seekable, IO::File, IO::Pipe, IO::Socket, IO::Dir.

You should instead explicitly import the IO modules you want.

perl v5.34.0
