List::MoreUtils::XS(3pm) User Contributed Perl Documentation List::MoreUtils::XS(3pm)

NAME

List::MoreUtils::XS - Provide compiled List::MoreUtils functions

SYNOPSIS

```
use List::MoreUtils::XS (); # doesn't export anything
use List::MoreUtils 'all'; # required to import functions

my @procs = get_process_stats->fetchall_array;
# sort by ppid, then pid
qsort { $a->[3] <=> $b->[3] or $a->[2] <=> $b->[2] } @procs;
while( @procs ) {
    my $proc = shift @procs;
    my @children = equal_range { $_->[3] <=> $proc->[2] } @procs;
}

my @left = qw(this is a test);
my @right = qw(this is also a test);
my %rinfo = listcmp @left, @right;

# on unsorted
my $i = firstidx { $_ eq 'yeah' } @foo;
```

```
# on sorted - always first, but might not be 'yeah'  
my $j = lower_bound { $_ cmp 'yeah' } @bar;  
# on sorted - any of occurrences, is surely 'yeah'  
my $k = bsearchidx { $_ cmp 'yeah' } @bar;
```

DESCRIPTION

List::MoreUtils::XS is a backend for List::MoreUtils. Even if it's possible (because of user wishes) to have it practically independent from List::MoreUtils, it technically depend on "List::MoreUtils". Since it's only a backend, the API is not public and can change without any warning.
