Rocky Enterprise Linux 9.2 Manual Pages on command 'ModPerl::CScan.3pm'

\$ man ModPerl::CScan.3pm

ModPerl::CScan(3pm) User Contributed Perl Documentation ModPerl::CScan(3pm)

NAME

ModPerl::CScan - scan C language files for easily recognized constructs.

SYNOPSIS

DESCRIPTION

See the "C::Scan" manpage. This package is just a fork to fix certain things that didn't work in the original "C::Scan", which is not maintained any longer. These fixes required to make it work with the Apache 2 source code.

perl v5.34.0

2022-02-06
