Pod::Perldoc::ToChecker(3perl) Perl Programmers Reference Guide Pod::Perldoc::ToChecker(3perl)

NAME

Pod::Perldoc::ToChecker - let Perldoc check Pod for errors

SYNOPSIS

```
% perldoc -o checker SomeFile.pod
```

No Pod errors in SomeFile.pod

(or an error report)

DESCRIPTION

This is a "plug-in" class that allows Perldoc to use Pod::Simple::Checker as a "formatter" class (or if that is not available, then Pod::Checker), to check for errors in a given Pod file.

This is actually a Pod::Simple::Checker (or Pod::Checker) subclass, and inherits all its options.

SEE ALSO

Pod::Simple::Checker, Pod::Simple, Pod::Checker, Pod::Perldoc
