Pod::Perldoc::ToXml(3perl) Perl Programmers Reference Guide Pod::Perldoc::ToXml(3perl)

NAME

Pod::Perldoc::ToXml - let Perldoc render Pod as XML

SYNOPSIS

perldoc -o xml -d out.xml Some::Modulename

DESCRIPTION

This is a "plug-in" class that allows Perldoc to use Pod::Simple::XMLOutStream as a formatter class.

This is actually a Pod::Simple::XMLOutStream subclass, and inherits all its options.

You have to have installed Pod::Simple::XMLOutStream (from the Pod::Simple dist), or this class won't work.

SEE ALSO

Pod::Simple::XMLOutStream, Pod::Simple, Pod::Perldoc
