Rocky Enterprise Linux 9.2 Manual Pages on command 'Proc::Killfam.3pm'

\$ man Proc::Killfam.3pm

Proc::Killfam(3pm) User Contributed Perl Documentation Proc::Killfam(3pm)

NAME

Proc::Killfam - kill a list of pids, and all their sub-children

SYNOPSIS

use Proc::Killfam;
killfam \$signal, @pids;

DESCRIPTION

killfam accepts the same arguments as the Perl builtin kill command, but, additionally, recursively searches the process table for children and kills them as well.

EXAMPLE

killfam 'TERM', (\$pid1, \$pid2, @more_pids);

KEYWORDS

kill, signal

perl v5.34.0 2022-02-06 Proc::Killfam(3pm)
