Test2::Event::Skip(3perl) Perl Programmers Reference Guide Test2::Event::Skip(3perl)

**NAME**

Test2::Event::Skip - Skip event type

**DESCRIPTION**

Skip events bump test counts just like Test2::Event::Ok events, but they can never fail.

**SYNOPSIS**

```
use Test2::API qw/context/;

use Test2::Event::Skip;

my $ctx = context();

my $event = $ctx->skip($name, $reason);
```

or:

```
my $ctx = context();

my $event = $ctx->send_event(
    'Skip',
    name => $name,
    reason => $reason,
);
```

## ACCESSORS

`$reason = $e->reason`

The original true/false value of whatever was passed into the event (but reduced down to 1 or 0).
