Test::Tester::Capture(3perl) Perl Programmers Reference Guide Test::Tester::Capture(3perl)

NAME

Test::Tester::Capture - Help testing test modules built with Test::Builder

DESCRIPTION

This is a subclass of Test::Builder that overrides many of the methods so that they don't output anything. It also keeps track of its own set of test results so that you can use Test::Builder based modules to perform tests on other Test::Builder based modules.

AUTHOR

Most of the code here was lifted straight from Test::Builder and then had chunks removed by Fergal Daly <fergal@esatclear.ie>.

LICENSE

Under the same license as Perl itself
