Types::Common::String(3pm) User Contributed Perl Documentation Types::Common::String(3pm)

NAME

Types::Common::String - drop-in replacement for MooseX::Types::Common::String

STATUS

This module is covered by the Type-Tiny stability policy.

DESCRIPTION

A drop-in replacement for MooseX::Types::Common::String.

Types

The following types are similar to those described in MooseX::Types::Common::String.

? SimpleStr

? NonEmptySimpleStr

? NumericCode

? LowerCaseSimpleStr

? UpperCaseSimpleStr

? Password

? StrongPassword

? NonEmptyStr

? LowerCaseStr

? UpperCaseStr

This module also defines an extra type constraint not found in `MooseX::Types::Common::String`.

? `StringLength[min, max]`

Type constraint for a string between *min* and *max* characters long. For example:

```
StringLength[4, 20]
```

It is sometimes useful to combine this with another type constraint in an intersection.

```
(LowerCaseStr) & (StringLength[4, 20])
```

The max length can be omitted.

```
StringLength[10] # at least 10 characters
```

Lengths are inclusive.

## BUGS

Please report any bugs to <<https://github.com/tobyink/p5-type-tiny/issues>>.
