NAME

Unicode::Collate::CJK::Pinyin - weighting CJK Unified Ideographs for Unicode::Collate

SYNOPSIS

```
use Unicode::Collate;

use Unicode::Collate::CJK::Pinyin;

my $collator = Unicode::Collate->new(
    overrideCJK => \&Unicode::Collate::CJK::Pinyin::weightPinyin
);
```

DESCRIPTION

"Unicode::Collate::CJK::Pinyin" provides "weightPinyin()", that is adequate for "overrideCJK" of "Unicode::Collate" and makes tailoring of CJK Unified Ideographs in the order of CLDR's pinyin ordering.

CAVEAT

The pinyin ordering includes some characters that are not CJK Unified Ideographs and can't utilize "weightPinyin()" for collation. For them, use "entry" instead.
