\$ man XML::Parser::Style::Debug.3pm

Parser::Style::Debug(3pm) User Contributed Perl Documentation Parser::Style::Debug(3pm)

NAME

XML::Parser::Style::Debug - Debug style for XML::Parser

SYNOPSIS

```
use XML::Parser;  
  
my $p = XML::Parser->new(Style => 'Debug');  
  
$p->parsefile('foo.xml');
```

DESCRIPTION

This just prints out the document in outline form to STDERR. Nothing special is returned by parse.

perl v5.34.0
