Rocky Enterprise Linux 9.2 Manual Pages on command 'aa-features-abi.1'

$ man aa-features-abi.1

AA-FEATURES-ABI(1)   AppArmor   AA-FEATURES-ABI(1)

NAME

   aa-features-abi - Extract, validate and manipulate AppArmor feature abis

SYNOPSIS

   aa-features-abi [OPTIONS] <SOURCE> [OUTPUT OPTIONS]

DESCRIPTION

   aa-features-abi is used to extract a features abi and output to either stdout or a

   specified file. A SOURCE_OPTION must be specified. If an output option is not specified

   the features abi is written to stdout.

OPTIONS

   aa-features-abi accepts the following arguments:

   -h, --help

      Display a brief usage guide.

   -d, --debug

      show messages with debugging information

   -v, --verbose

      show messages with stats

SOURCE

   -x, --extract

      Extract the features abi for the kernel

   -f FILE, --file=FILE

      Load the features abi from FILE and send it to OUTPUT OPTIONS.

OUTPUT OPTIONS

--stdout

    Write the features abi to stdout, this is the default if no output option is

    specified.

-w FILE, --write FILE

    Write the features abi to FILE.

BUGS

If you find any bugs, please report them at

<https://gitlab.com/apparmor/apparmor/-/issues>.
