Rocky Enterprise Linux 9.2 Manual Pages on command 'buildah-images.1'

\$ man buildah-images.1

buildah-images(1) General Commands Manual buildah-images(1)

NAME

buildah-images - List images in local storage.

SYNOPSIS

buildah images [options] [image]

DESCRIPTION

Displays locally stored images, their names, sizes, created date and their IDs. The created date is displayed in the time locale of the local machine.

OPTIONS

--all, -a

Show all images, including intermediate images from a build.

--digests

Show the image digests.

--filter, -f=[]

Filter output based on conditions provided (default []).

Filters:

after,since=image

Filter on images created since the given image.

before=image

Filter on images created before the given image.

dangling=true|false

Show dangling images. An image is considered to be dangling if it has no associated names and tags.

id=id

Show image with this specific ID.

intermediate=true|false

Show intermediate images. An image is considered to be an intermediate image if it is dangling and has no children.

label=key[=value]

Filter by images labels key and/or value.

readonly=true|false

Show only read only images or Read/Write images. The default is to show both.

Read/Only images can be configured by modifying the "additionalimagestores" in the /etc/containers/storage.conf file.

reference=reference

Show images matching the specified reference. Wildcards are supported (e.g., "reference=fedora:3").

--format="TEMPLATE"

Pretty-print images using a Go template.

Valid placeholders for the Go template are listed below:

??

?Placeholder ? Description ?

??

?Created ? Creation date in epoch time ?

??

?CreatedAt ? Creation date Pretty Formatted ?

??

?CreatedAtRaw ? Creation date in raw format ?

??

?Digest ? Image Digest ?

??

?ID ? Image ID ?

??

?Name ? Image Name ?

??

?ReadOnly ? Indicates if image came from a ?

? ? R/O store ?
??
?.Size ? Image Size ?
??
?.Tag ? Image Tag ?
??

--history

Display the image name history.

--json

Display the output in JSON format.

--noheading, -n

Omit the table headings from the listing of images.

--no-trunc

Do not truncate output.

--quiet, -q

Displays only the image IDs.

EXAMPLE

buildah images
buildah images fedora:latest
buildah images --json
buildah images --quiet
buildah images -q --noheading --no-trunc
buildah images --quiet fedora:latest
buildah images --filter dangling=true
buildah images --format "ImageID: {{.ID}}"
