$ man byobu-ctrl-a.1

byobu-ctrl-a(1)   byobu   byobu-ctrl-a(1)

NAME

   byobu-ctrl-a - Configure Byobu's ctrl-a behavior

DESCRIPTION

   byobu-ctrl-a is an interactive program that allows a user to configure the behavior of the

   'ctrl-a' key sequence.

   Traditional GNU screen(1) uses ctrl-a as its escape character, while GNU emacs(1) uses

   ctrl-a to move the cursor to the beginning of the line. This conflict has caused unending

   amounts of grief among Screen, Byobu, and Emacs-mode users.

   Thus, this program exists to allow each user to choose the behavior of ctrl-a in their lo?

   cal environment.
