Rocky Enterprise Linux 9.2 Manual Pages on command 'docker-manifest-rm.1'

\$ man docker-manifest-rm.1

podman-manifest-rm(1) General Commands Manual podman-manifest-rm(1)

NAME

podman-manifest-rm - Remove manifest list or image index from local storage

SYNOPSIS

podman manifest rm list-or-index [...]

DESCRIPTION

Removes one or more locally stored manifest lists.

EXAMPLE

podman manifest rm <list>

podman manifest rm listid1 listid2

storage.conf (/etc/containers/storage.conf)

storage.conf is the storage configuration file for all tools using containers/storage

The storage configuration file specifies all of the available container storage options

for tools using shared container storage.
