EXP2(3)                      Linux Programmer's Manual                      EXP2(3)

#### NAME

exp2, exp2f, exp2l - base-2 exponential function

#### SYNOPSIS

```
#include <math.h>
```

```
double exp2(double x);
```

```
float exp2f(float x);
```

```
long double exp2l(long double x);
```

Link with -lm.

Feature Test Macro Requirements for glibc (see feature\_test\_macros(7)):

```
exp2(), exp2f(), exp2l():
```

```
_ISOC99_SOURCE || _POSIX_C_SOURCE >= 200112L
```

#### DESCRIPTION

These functions return the value of 2 raised to the power of x.

#### RETURN VALUE

On success, these functions return the base-2 exponential value of x.

For various special cases, including the handling of infinity and NaN, as well as over?

flows and underflows, see exp(3).

#### ERRORS

See math\_error(7) for information on how to determine whether an error has occurred when calling these functions.

For a discussion of the errors that can occur for these functions, see exp(3).

#### VERSIONS

These functions first appeared in glibc in version 2.1.
