$ man npm-restart.1

NPM-RESTART(1)   NPM-RESTART(1)

NAME

    npm-restart - Restart a package

 Synopsis

    npm restart [-- <args>]

 Description

    This restarts a project. It is equivalent to running npm run-script restart.

    If the current project has a "restart" script specified in package.json, then the follow?

    ing scripts will be run:

    1. prerestart

    2. restart

    3. postrestart

    If it does not have a "restart" script specified, but it does have stop and/or start

    scripts, then the following scripts will be run:

    1. prerestart

    2. prestop

    3. stop

    4. poststop

    5. prestart

    6. start

    7. poststart

    8. postrestart

Configuration

<!-- AUTOGENERATED CONFIG DESCRIPTIONS START --> <!-- automatically generated, do not edit manually --> <!-- see lib/utils/config/definitions.js -->

ignore-scripts

? Default: false

? Type: Boolean

If true, npm does not run scripts specified in package.json files.

Note that commands explicitly intended to run a particular script, such as npm start, npm stop, npm restart, npm test, and npm run-script will still run their intended script if ignore-scripts is set, but they will not run any pre- or post-scripts. <!-- automatically generated, do not edit manually --> <!-- see lib/utils/config/definitions.js -->

script-shell

? Default: '/bin/sh' on POSIX systems, 'cmd.exe' on Windows

? Type: null or String

The shell to use for scripts run with the npm exec, npm run and npm init <pkg> commands.

<!-- automatically generated, do not edit manually --> <!-- see lib/utils/config/defini? tions.js -->
