Rocky Enterprise Linux 9.2 Manual Pages on command 'ops.3perl'

\$ man ops.3perl

ops(3perl) Perl Programmers Reference Guide ops(3perl)

NAME

ops - Perl pragma to restrict unsafe operations when compiling

SYNOPSIS

```
perl -Mops=:default ... # only allow reasonably safe operations
perl -M-ops=system ... # disable the 'system' opcode
```

DESCRIPTION

Since the "ops" pragma currently has an irreversible global effect, it is only of significant practical use with the "-M" option on the command line.

See the Opcode module for information about opcodes, optags, opmasks and important information about safety.
