NAME

podman-volume-prune - Remove all unused volumes

SYNOPSIS

podman volume prune [options]

DESCRIPTION

Removes unused volumes. By default all unused volumes will be removed, the --filter flag can be used to filter specific volumes. You will be prompted to confirm the removal of all the unused volumes. To bypass the confirmation, use the --force flag.

OPTIONS

--force, -f

Do not prompt for confirmation.

--filter

Filter volumes to be pruned. Volumes can be filtered by the following attributes:

??

?Filter ? Description ?

??

?label ? [Key] or [Key=Value] Label as? ?

? ? signed to a volume ?

??

?until ? Only remove volumes created be? ?

? ? fore given timestamp ?

??

--help

Print usage statement
