Linux Ubuntu 22.4.5 Manual Pages on command 'podselect.1'

$ man podselect.1

PODSELECT(1)   Perl Programmers Reference Guide   PODSELECT(1)

NAME

    podselect - print selected sections of pod documentation on standard output

SYNOPSIS

    podselect [-help] [-man] [-section?section-spec] [file?...]

OPTIONS AND ARGUMENTS

    -help   Print a brief help message and exit.

    -man   Print the manual page and exit.

    -section?section-spec

        Specify a section to include in the output. See "SECTION SPECIFICATIONS"

        in Pod::Parser for the format to use for section-spec. This option may be

        given multiple times on the command line.

    file   The pathname of a file from which to select sections of pod documentation

        (defaults to standard input).

DESCRIPTION

    podselect will read the given input files looking for pod documentation and will

    print out (in raw pod format) all sections that match one ore more of the given

    section specifications. If no section specifications are given than all pod

    sections encountered are output.

    podselect invokes the podselect() function exported by Pod::Select Please see

    "podselect()" in Pod::Select for more details.
