Rocky Enterprise Linux 9.2 Manual Pages on command 'setsid.1'

$ man setsid.1

SETSID(1)   User Commands   SETSID(1)

NAME

   setsid - run a program in a new session

SYNOPSIS

   setsid [options] program [arguments]

DESCRIPTION

   setsid runs a program in a new session. The command calls fork(2) if already a process

   group leader. Otherwise, it executes a program in the current process. This default

   behavior is possible to override by the --fork option.

OPTIONS

   -c, --ctty

      Set the controlling terminal to the current one.

   -f, --fork

      Always create a new process.

   -w, --wait

      Wait for the execution of the program to end, and return the exit status of this

      program as the exit status of setsid.

   -V, --version

      Display version information and exit.

   -h, --help

      Display help text and exit.
