   ssh-argv0 replaces the old ssh command-name as hostname handling. If you link to this

   that hostname as an argument. All other arguments are passed to ssh and will be processed

   normally.

AUTHORS

   OpenSSH is a derivative of the original and free ssh 1.2.12 release by Tatu Ylonen. Aaron

   Campbell, Bob Beck, Markus Friedl, Niels Provos, Theo de Raadt and Dug Song removed many

   bugs, re-added newer features and created OpenSSH. Markus Friedl contributed the support

   for SSH protocol versions 1.5 and 2.0. Natalie Amery wrote this ssh-argv0 script and the

   associated documentation.
