**\$ man wmemchr.3**

WMEMCHR(3)                      Linux Programmer's Manual                      WMEMCHR(3)

**NAME**

wmemchr - search a wide character in a wide-character array

**SYNOPSIS**

```
#include <wchar.h>

wchar_t *wmemchr(const wchar_t *s, wchar_t c, size_t n);
```

**DESCRIPTION**

The wmemchr() function is the wide-character equivalent of the memchr(3) function. It searches the n wide characters starting at s for the first occurrence of the wide character c.

**RETURN VALUE**

The wmemchr() function returns a pointer to the first occurrence of c among the n wide characters starting at s, or NULL if c does not occur among these.

**ATTRIBUTES**

For an explanation of the terms used in this section, see attributes(7).
