File::HomeDir::Driver(3pm) User Contributed Perl Documentation File::HomeDir::Driver(3pm)

NAME

File::HomeDir::Driver - Base class for all File::HomeDir drivers

DESCRIPTION

This module is the base class for all File::HomeDir drivers, and must be inherited from to identify a class as a driver.

It is primarily provided as a convenience for this specific identification purpose, as File::HomeDir supports the specification of custom drivers and an "->isa" check is used during the loading of the driver.
