File::HomeDir::MacOS9(3pm) User Contributed Perl Documentation File::HomeDir::MacOS9(3pm)

NAME

File::HomeDir::MacOS9 - Find your home and other directories on legacy Macintosh systems

SYNOPSIS

```
use File::HomeDir;
```

```
# Find directories for the current user
```

```
$home = File::HomeDir->my_home;
```

```
$desktop = File::HomeDir->my_desktop;
```

DESCRIPTION

This module provides implementations for determining common user directories on legacy Mac hosts. In normal usage this module will always be used via File::HomeDir.

This module is no longer actively maintained, and is included only for extreme back-compatibility.

Only the "my_home" and "my_desktop" methods are supported.

SUPPORT

See the support section the main File::HomeDir module.
