XML::LibXML::Boolean(3pm) User Contributed Perl Documentation XML::LibXML::Boolean(3pm)

NAME

XML::LibXML::Boolean - Boolean true/false values

DESCRIPTION

XML::LibXML::Boolean objects implement simple boolean true/false objects.

API

XML::LibXML::Boolean->True

Creates a new Boolean object with a true value.

XML::LibXML::Boolean->False

Creates a new Boolean object with a false value.

value()

Returns true or false.

to_literal()

Returns the string "true" or "false".
