**C:~\man XtSessionReturnToken.3**

XtSessionGetToken(3)                    XT FUNCTIONS                    XtSessionGetToken(3)

### NAME

XtSessionGetToken, XtSessionReturnToken - token management for checkpointing

### SYNTAX

XtCheckpointToken XtSessionGetToken(Widget w, int type);

void XtSessionReturnToken(XtCheckpointToken token);

### ARGUMENTS

w        Specifies the session widget.

type     Specifies the value in the type field of the token.

token    Specifies the token to be returned.

### DESCRIPTION

The XtSessionGetToken function will return NULL if the checkpoint operation instigated by the session manager is not currently under way.

To indicate the completion of a deferred save operation and to return the checkpoint token use XtSessionReturnToken.
