C:\>man XtToolkitThreadInitialize.3

XtToolkitThreadInitialize(3) XT FUNCTIONS XtToolkitThreadInitialize(3)

NAME

XtToolkitThreadInitialize - initialize the toolkit for multiple threads

SYNTAX

Boolean XtToolkitThreadInitialize(void);

DESCRIPTION

If XtToolkitThreadInitialize was previously called, it returns. The application programmer must ensure that two or more threads do not simultaneously attempt to call XtToolkitThreadInitialize; the effect of this is undefined. XtToolkitThreadInitialize returns True if the host operating system has threads and the Intrinsics are thread safe.
