ADD-SHELL(8) System Manager's Manual ADD-SHELL(8)

NAME

add-shell - add shells to the list of valid login shells

SYNOPSIS

add-shell shellname [shellname...]

DESCRIPTION

add-shell copies `/etc/shells` to `/etc/shells.tmp`, adds the given shells to this file if they are not already present, and copies this temporary file back to `/etc/shells`.

The shells must be provided by their full pathnames.
