

Rocky Enterprise Linux 9.2 Manual Pages on command 'addgnupghome.8'

C:\>man addgnupghome.8

ADDGNUPGHOME(8) GNU Privacy Guard 2.2 ADDGNUPGHOME(8)

NAME

addgnupghome - Create .gnupg home directories

SYNOPSIS

addgnupghome account_1 account_2...account_n

DESCRIPTION

If GnuPG is installed on a system with existing user accounts, it is sometimes required to populate the GnuPG home directory with existing files. Especially a `trustlist.txt` and a keybox with some initial certificates are often desired.

This script helps to do this by copying all files from `/etc/skel/.gnupg/` to the home directories of the accounts given on the command line. It takes care not to overwrite existing GnuPG home directories.

addgnupghome is invoked by root as:

addgnupghome account1 account2 ... accountn

GnuPG 2.2.19
