

Rocky Enterprise Linux 9.2 Manual Pages on command 'addpart.8'

C:\>man addpart.8

ADDPART(8) System Administration ADDPART(8)

NAME

addpart - tell the kernel about the existence of a partition

SYNOPSIS

addpart device partition start length

DESCRIPTION

addpart tells the Linux kernel about the existence of the specified partition. The

command is a simple wrapper around the "add partition" ioctl.

This command doesn't manipulate partitions on a block device.

PARAMETERS

device The disk device.

partition

The partition number.

start The beginning of the partition (in 512-byte sectors).

length The length of the partition (in 512-byte sectors).

SEE ALSO

delpart(8), fdisk(8), parted(8), partprobe(8), partx(8)

AVAILABILITY

The addpart command is part of the util-linux package and is available from

<https://www.kernel.org/pub/linux/utils/util-linux/>.
