

Rocky Enterprise Linux 9.2 Manual Pages on command 'bundle-show2.7.1'

C:\>man bundle-show2.7.1

BUNDLE-SHOW(1)

BUNDLE-SHOW(1)

NAME

bundle-show - Shows all the gems in your bundle, or the path to a gem

SYNOPSIS

bundle show [GEM] [--paths]

DESCRIPTION

Without the [GEM] option, show will print a list of the names and versions of all gems that are required by your [Gemfile(5)][Gemfile(5)], sorted by name.

Calling show with [GEM] will list the exact location of that gem on your machine.

OPTIONS

--paths

List the paths of all gems that are required by your [Gemfile(5)][Gemfile(5)], sorted by gem name.
