

Rocky Enterprise Linux 9.2 Manual Pages on command 'c89-gcc.1'

C:\>man c89-gcc.1

C89(1) General Commands Manual C89(1)

NAME

c89 - ANSI (1989) C compiler

SYNOPSIS

c89 [-pedantic] [-pedantic-errors] [-D_ANSI_SOURCE] options ...

DESCRIPTION

Calls the C compiler (cc) with the given options, using a C language environment compatible with the -ansiC specification.

This includes proper handling of trigraphs, disabling non-ANSI compiler features (such as asm, inline, typeof, and the \$ character in identifiers), and definition of the preprocessor symbol `__STRICT_ANSI__`.

SEE ALSO

cc(1) for a description of all options.

HISTORY

Appeared in NetBSD 1.4.

BUGS

Since c89 is a shell wrapper script to cc, compile errors are prefixed by "cc:".
