

## ***Rocky Enterprise Linux 9.2 Manual Pages on command 'devlink-monitor.8'***

**C:\>man devlink-monitor.8**

DEVLINK-MONITOR(8)                      Linux                      DEVLINK-MONITOR(8)

### NAME

devlink-monitor - state monitoring

### SYNOPSIS

devlink monitor [ all | OBJECT-LIST ]

### DESCRIPTION

The devlink utility can monitor the state of devlink devices and ports continuously. This option has a slightly different format. Namely, the monitor command is the first in the command line and then the object list.

OBJECT-LIST is the list of object types that we want to monitor. It may contain dev, port, trap, trap-group.

devlink opens Devlink Netlink socket, listens on it and dumps state changes.

### SEE ALSO

devlink(8), devlink-dev(8), devlink-sb(8), devlink-port(8), devlink-trap(8),
