

## ***Rocky Enterprise Linux 9.2 Manual Pages on command 'enchant-lsmod-2.1'***

### **C:\>man enchant-lsmod-2.1**

ENCHANT-LSMOD-2(1)            General Commands Manual            ENCHANT-LSMOD-2(1)

#### NAME

Enchant - list provider and dictionary information

#### SYNOPSIS

enchant-lsmod-2 *[[*-lang|-word-chars] [language\_tag]*]-list-dicts|-help|-version*]

#### DESCRIPTION

enchant-lsmod-2 gives information about Enchant's spell-checker providers and the dictionaries each offers. See enchant-2(1) for details about how the providers and dictionaries are located. If no command-line options are given, the available providers are listed.

#### OPTIONS

-lang Show which provider and dictionary will be used for the given language, or all languages if none is supplied.

-word-chars

Show the extra word characters for the given language, if available. This is of little interest to most users.

-list-dicts

List the provider and dictionary for all available languages.

-help Show brief help.

-version

Prints the program's version.

#### SEE ALSO
