

Rocky Enterprise Linux 9.2 Manual Pages on command 'expiry.1'

C:\>man expiry.1

EXPIRY(1) User Commands EXPIRY(1)

NAME

expiry - check and enforce password expiration policy

SYNOPSIS

expiry option

DESCRIPTION

The expiry command checks (-c) the current password expiration and forces (-f) changes when required. It is callable as a normal user command.

OPTIONS

The options which apply to the expiry command are:

-c, --check

Check the password expiration of the current user.

-f, --force

Force a password change if the current user has an expired password.

-h, --help

Display help message and exit.

FILES

/etc/passwd

User account information.

/etc/shadow

Secure user account information.
